

## PROJECT PROCESS

---

Unfortunately, due the worldwide epidemic of Covid 19 it is impossible to hold international meetings of project partners. Despite this very difficult period, we manage to communicate regularly with the help of online communication channels. The partners always participate in all online meetings and together we discuss about the project delivers and activities.

December 2020

### WEB-APP TENDER TOOL

The TENDER Web Application has been launched in Autumn 2020 for testing within partnership and consequently with the intermediaries in all participating countries. The feedback has been collected and so far the suggestions are related to the technical details; the target group likes design, functionality and mainly purpose of the application.

## Project Partners

**JKVG**  
(Belgium)

**Euroface Consulting**  
(Czech Republic)

**Siglo22**  
(Spain)

**Consorzio social Lab**  
(Italy)

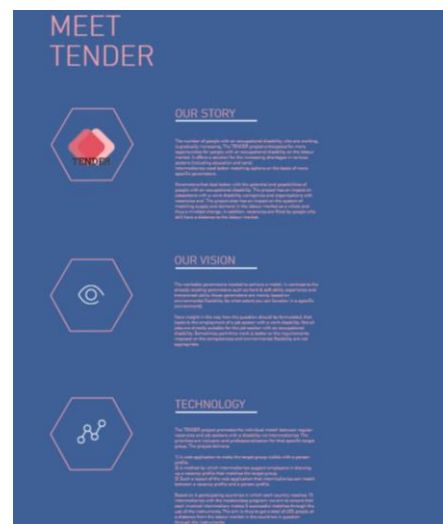

**Pro Work**  
(Netherlands)

## Launching the Project Website

After months of development we would like to introduce our project website

[www.tenderproject.eu](http://www.tenderproject.eu) that has been translated in every partner language.

The website is divided into several sections. We tried to make the website fresh and at the same time clear and systematic.

### FAST

The TENDER project promotes the idea of a web application that enables users and citizens with a disability to interact with the project and its services.

The project aims to:  
1. A web application to make the target group visible with a person profile.  
2. A web application to make the target group visible in a way that is not visible to the target group.  
3. To make a part of the web application that can be used to make a person profile and a person profile.

### EASY

The web application can be used by people who are not familiar with the target group, i.e. citizens of Europe who are not familiar with the target group. The web application is designed to be user-friendly and easy to use for people who are not familiar with the target group.

The TENDER application is designed to be user-friendly and easy to use for people who are not familiar with the target group. The web application is designed to be user-friendly and easy to use for people who are not familiar with the target group.

### SECURE

Application security testing has been done to ensure that the application is secure and that the data is protected. The application is designed to be secure and that the data is protected.

When an intermediary agrees to the application and its use, the intermediary becomes responsible for the personal data of the user and the application.

The TENDER application is designed to be secure and that the data is protected. The web application is designed to be user-friendly and easy to use for people who are not familiar with the target group.
