

# Our project

The ART project aims at providing a special training model that can guarantee:

- the opportunity for **pupils** between the ages of 8 and 16 to receive innovative education on global citizenship (including art, culture, religion, etc.), with the aim of exploring, discovering and stimulating their interest in many areas
- the possibility for **teachers/educators** to contribute to the development of the teaching materials and the presentation of this material on the platform and via the app via the VR method to stimulate the inclusive nature of education and to be trained to do so.

## VR methodology Global citizenship Art education

# Our mission and vision

## OUR STRATEGY

The ART project intends to connect Virtual Reality (VR) methodology to global citizenship and art education therefore making it possible to (online) teach global citizenship including art / culture in an attractive and creative way (while reducing the CO2 emissions!).

## OUR WORKPLAN

The COVID-19 pandemic has an effect on the mobility of everyone, but also of students and teachers and this created the need to acquire new technical skills and to develop new educational plans.

One of these has been the introduction of **VR technology into schools.**

It can be a way to better educate students in primary and secondary education about the changing world in which we live through an innovative, modern and appealing way.

Within ART project we will produce:

- a conceptual framework incl. need analyses
- a basic and progress test regarding the knowledge (and behaviour) of students about global citizenship
- an online platform and an handbook to use it
- a piloting in each involved country

”

VR + global citizenship:  
a wonderful  
combination that  
brings the world from  
far nearby

“
